Photography & video style

A practical direction sheet for honest, consistent property imagery. Follow applicable property, privacy, and media rules.

Exterior

Living space

Kitchen

Image standards

Use as a checklist before the listing is published.

Light & color

Use natural daylight where possible. Keep whites neutral and color correction restrained. Do not hide material condition or alter permanent features.

Composition

Keep vertical lines straight. Show each room clearly. Include a mix of exterior, living spaces, kitchen, bedrooms, bathrooms, and meaningful details.

Video

Move slowly and steadily. Keep clips short and level. Use readable captions, accurate property facts, and music you are licensed to use.

Privacy & accuracy

Remove visible personal information. Get permission for identifiable people and any third-party content. Confirm that photos represent the current property and follow local listing rules.

Color & finish

Keep whites neutral, wood tones natural, and blue accents restrained. Avoid heavy filters, exaggerated saturation, dark shadows, or edits that misrepresent the home.

Property photos in this kit are illustrative generated samples. Replace them with authorized, accurate photos of each actual listing.
